Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Examiner acknowledges Applicant's submission of the amendment filed on 04/05/05.

Claims 1-5, 7-11 are now pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duhaylongsod et al (U.S.6,113,588) in view of Chin (U.S.5,916,233). Duhaylongsod teaches a method of harvesting a section of vessel using a light catheter (see Figure 7 and the description of Figure 7 at column 7, lines 65+) through an incision in the body. Duhaylongsod specifically discloses the surgeon performing a dissection but is silent as to what specifically is being dissected. Chin is cited as a teaching illustration that it is well known to isolate a vessel by dissecting connective tissue surrounding the vessel for the purpose of vessel harvesting (see the Abstract). Prior to this step Duhaylongsod teaches inserting the transilluminator (light) catheter 10 into a saphenous vein 84 in order to illuminate the vein 84 and the connective tissue. The light from the transilluminator is inherently intense enough to illuminate the vein from the inside as claimed so that the vessel section is visible from its exterior. Duhaylongsod further teaches that a conventional endoscope can be used in combination with the catheter for viewing the procedure. Cutting the vessel at first and second ends and removing the vessel section from the patient's body are but inherent steps in performing the procedure. It would have been obvious to one of ordinary skill in the art to combine the teachings of Duhaylongsod with those of Chin to teach that it is well known to dissect the connective tissue away from a vessel in order to harvest that vessel.

Allowable Subject Matter

4. Claims 2-5, 8-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fadi H. Dahbour whose telephone number is 571-272-4792. The examiner can normally be reached on M-F, 9am-5:30pm est.
